School of Postgraduate Studies, Research and Development

TERMS OF REFERENCE

In its quest towards attaining Global Standards, as well as moving towards being a significant player in national development, The University of Trinidad and Tobago (UTT) should have a high level of relevant post graduate activity, the bulk of which must involve cutting edge Research and Development work. The development and monitoring of these activities will be the responsibility of the Board of Post Graduate Studies and Research which will report to the Board of Governors through the Academic Council of the University.

In formulating the Terms of Reference for the operation of the Board it is appropriate to classify its activities into three basic areas, namely research activities, the academic issues associated with post graduate activity and the award of scholarships and fellowships.
